- Easy-to-use connection for CD-R/W or hard disk is provided for back-up or archiving

Description - The Mobile DVR (SMD-04) is a 4 camera 120fps (real-time) digital video and audio recorder system especially meant for use in vehicles. Contained in a small but rugged case, the SMD-04 is an excellent choice for vehicle security applications and when portability is a factor. The ability to connect from 1 to 4 CCTV cameras and display and record at a full 30fps per camera with a choice of MPEG1 or MPEG2 compression makes the SMD-04 a powerful and high performance DVR in its own right. In addition, up to 4 channels of audio can also be recorded. Add double shock and vibration protection, LAN and Internet connectivity, external CD-RW and hard disk backup, removable hard disk, vehicle status and speed display recording, super reliability and a highly competitive price and the SMD-04 stands out as a leading state-of-the-art mobile DVR.
