- Manages storage and recycles space automatically
- Simultaneous viewing, recording, playback and remote access
- PTZ and POS enabled
- Remote monitoring and recording

**Description** - The V Series digital video recorders (DVRs), based on the GV series video capture cards, provide superb digital video surveillance solutions. The V Series supports up to 16 cameras and up to 480fps. Digitally recorded video is optimally compressed yet retains excellent image quality. The V Series DVRs support alarm input and output devices, allow control of PTZ cameras, and feature remote monitoring, remote recording and viewing by multiple clients simultaneously. The advanced motion detection feature avoids false alarms through noise reduction, and provides several methods to notify about intrusions or abnormal situations, instantly. A complete multi-level password access control and audit log ensures a true secured environment.
